# SOME OF THE Portfolios

## LMS Learning Management System

Learning Management System is a software used to facilitate e-learning, content management, student performance analysis, and detailed reporting. It has different uses for different entities, For example: Students learn from digital courses organized in LMS. Faculty/Trainer creates digital courses and manages in LMS. Institute/School/Coaching/Organization design the digital courses and sale online. Also, it can analyze the overall business insights through a reporting system.

There are different features in LMS, some of them are as below: Learn through videos/digital content. Performance Evaluation through Online Tests and Assignments. Share learning resources upload/link. Store/Online Shop for buying courses. Course progress tracking. Analyze the content access like watch minutes, view count, download count, etc. and Feedback system.
